Marine Response Counter Pollution Service

Adler and Allan Marine Response Counter Pollution Service

As a subscriber to the Adler and Allan Marine Response Service you will benefit from a UK-wide network of trained personnel and fit for purpose assets ready to meet your Counter Pollution needs, on time, on station, 24hrs per day and 365 days per year.

As the largest provider of counter pollution services to UK Ports and Harbours, Adler and Allan understand that you require capability and integrity from your contractor, in essence you need assurance that your obligations under OPRC legislation are in safe hands.

In this folder you will find:

1. The Service Level Certificate
2. The Emergency Response Schedule of Charges
3. The Subscriber Agreement
4. The Counter Pollution Added Value Services

People you can trust

Responding to marine spills is not for the inexperienced, it requires knowledge gained from years of practical experience supported by membership of the UK Maritime and Coastguard Agency approved Spill Contractor Accreditation Scheme.

The Adler and Allan Marine Response Team has everything you need to mount an effective and safe response to a pollution incident in the marine environment. The core team of Advisors, On-Scene Commanders, Consultants, Supervisors and Responders is accredited to the highest level under the UK Spill Scheme.

Our expertise is not just limited to the marine environment, we can help clients resolve the most demanding environmental problems, on land or on the water.

The right equipment

Adler and Allan's unique approach to pollution response in the marine environment saves valuable mobilisation time and ensures that the appropriate level of equipment and resources arrives on time and combat ready at the spill site.

The national fleet of Rapid Response Vehicles (RRV) is a significant financial and knowledge based investment, strategically located throughout the UK. The content of each RRV is identical and guaranteed through an audited asset management scheme. Adler and Allan operate a competency training matrix and duty manager system that ensure one Spill Supervisor and two Responders are always available to rapidly mobilise each RRV.

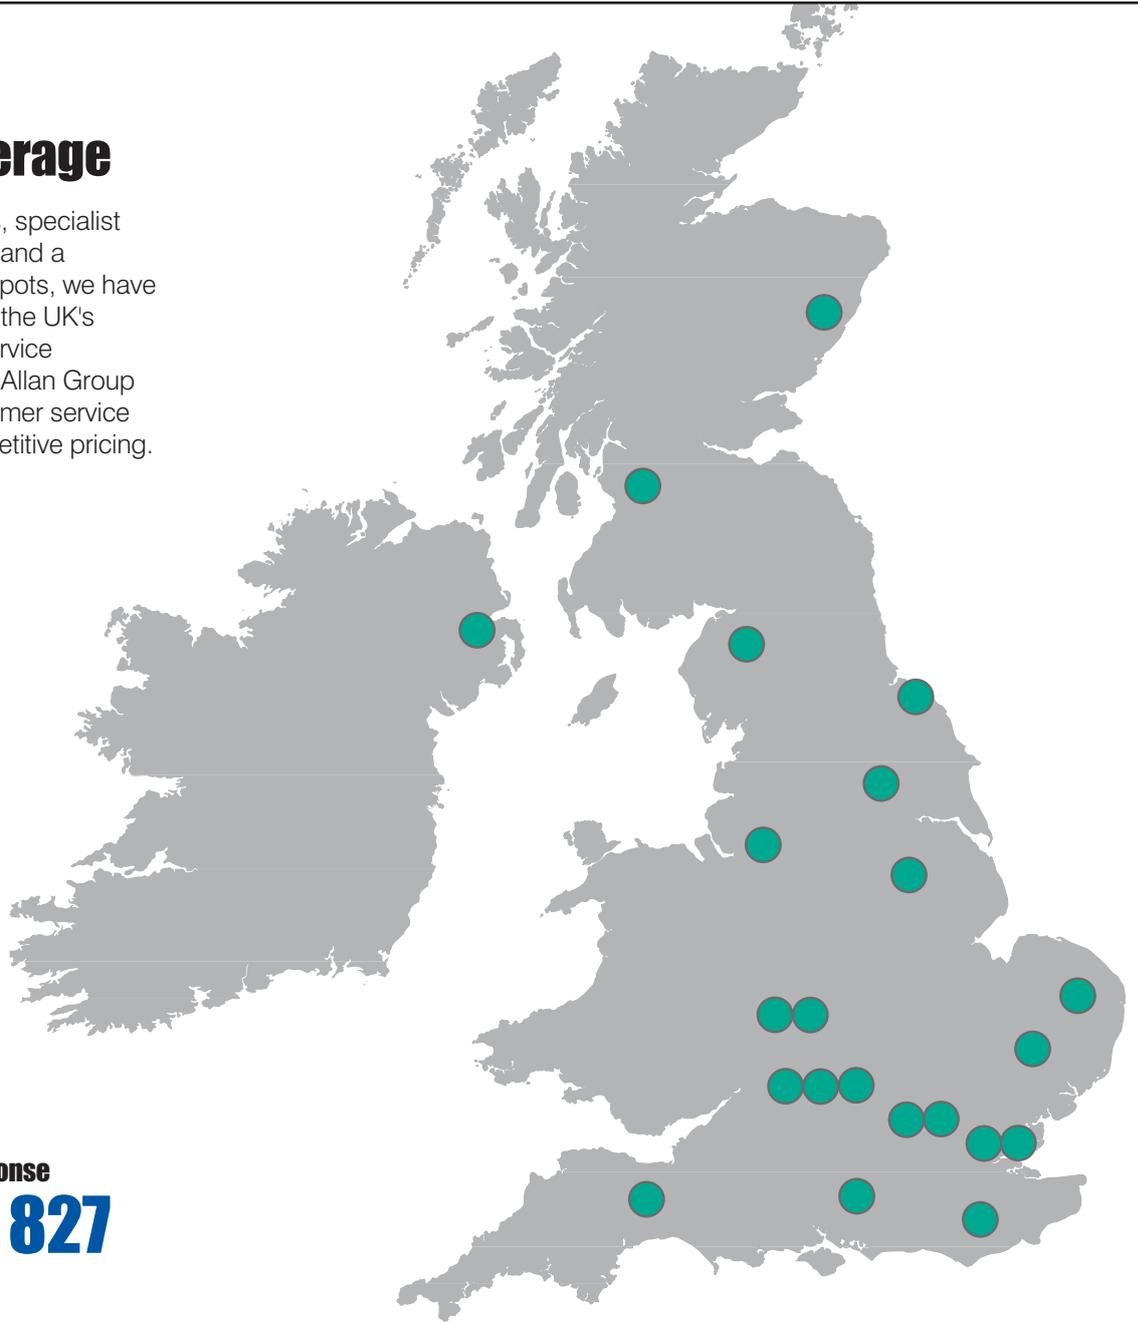

The complete package

Subscribers to the Marine Response Service benefit from access to a range of complementary services at discounted prices. Accredited training, contingency planning, risk assessment, waste management and contaminated land services make the Adler and Allan package a truly effective Counter Pollution Service.

Let Adler and Allan take responsibility for managing all your OPRC compliance issues, this is carried out on a five year cycle ensuring that contingency planning, training and exercising levels are maintained to optimum levels throughout.

National Coverage

With highly trained teams, specialist equipment and vehicles, and a nationwide network of depots, we have grown to become one of the UK's leading environmental service providers. The Adler and Allan Group combine unrivalled customer service with capability and competitive pricing.
