

Adler and Allan
Separator Services Division

What lies beneath? Avoid a disaster with regular separator maintenance

24 Hour Emergency Response

0800 592 827

We offer the most cost effective environmental service for all your oil separators and underground tank systems

Since 1926 Adler and Allan have been offering customers like you a quality service.

We provide specialist services at competitive pricing for all makes of oil separators and tanks and we provide this service to names like:

Why do you need a service contract?

- To reduce the threat of disruption on your site
- To reduce the risk of flooding
- To meet the obligations from the Environmental Agency PPG3 & European Standard EN858-2
- To prevent the risk of expensive fines and the cost of clean ups
- To help your company achieve ISO 14001
- To avert bad PR
- To protect the environment

Avoid Disasters & Fines

Financial cost attributed to low maintenance can be caused by:

- Saturated and dirty coalescent filters
- Blocked safety devices
- Alarms not working
- High accumulations of silt and sludge that collects in the bottom of tanks

The Environment Agency is now focusing on all premises due to the growing number of oil pollution incidents they are called to attend. Many of these alarming occurrences can be attributed to separators not being serviced properly and have resulted in water courses being polluted and site owners being prosecuted.

It is important to understand that separators require regular maintenance in order to prevent pollution. The EA PPG3 and European Standard EN858-2 stipulates that they are serviced at least twice a year and in accordance to the manufacturer's instructions and guarantees.

Case Study - Separator Services

TAG Farnborough Airport (TAG FA) has invested over £100 million in to developing an unrivalled and exclusive business aviation facility. Protection of the environment and mitigation of the potential effects of airport operations are of a high priority and as such, service providers involved in this area must be of the highest competence. Adler and Allan have been contracted to carry out routine servicing of our separators, interceptor and containment tank networks and undertake all repair and emptying work as identified. Over the past twelve months Adler and Allan have demonstrated a detailed specialist knowledge in this area combined with first class working procedures and a high level of customer service."

Miles H Thomas, Environment Manager
TAG Farnborough Airport

So what else do we do...

We can service

- Separators
- Alarms
- Sewage Treatment Plants
- Pump Stations
- Bund Water Control Units

We can install

- Separators
- Sewage Treatment Plants
- Pump Stations
- Bund Water Control Units

We can also...

- Provide vacuum tanker disposal of contaminates
- Filter contaminated liquid with Sockit Filter System
- Replace and dispose of coalescing filters
- Replace faulty equipment

Commissioning

- Upon completion of your installation we can issue a certificate to facilitate a formal site handover. As part of commissioning contract we offer the first service FREE if it is part of our Service and Maintenance contract.

Alarm Installations

- We fit new and repair separator alarms. Correctly fitted and functioning alarms will avoid you unnecessary emptying and so save you money. It is important to remember that this equipment needs to be regularly serviced.

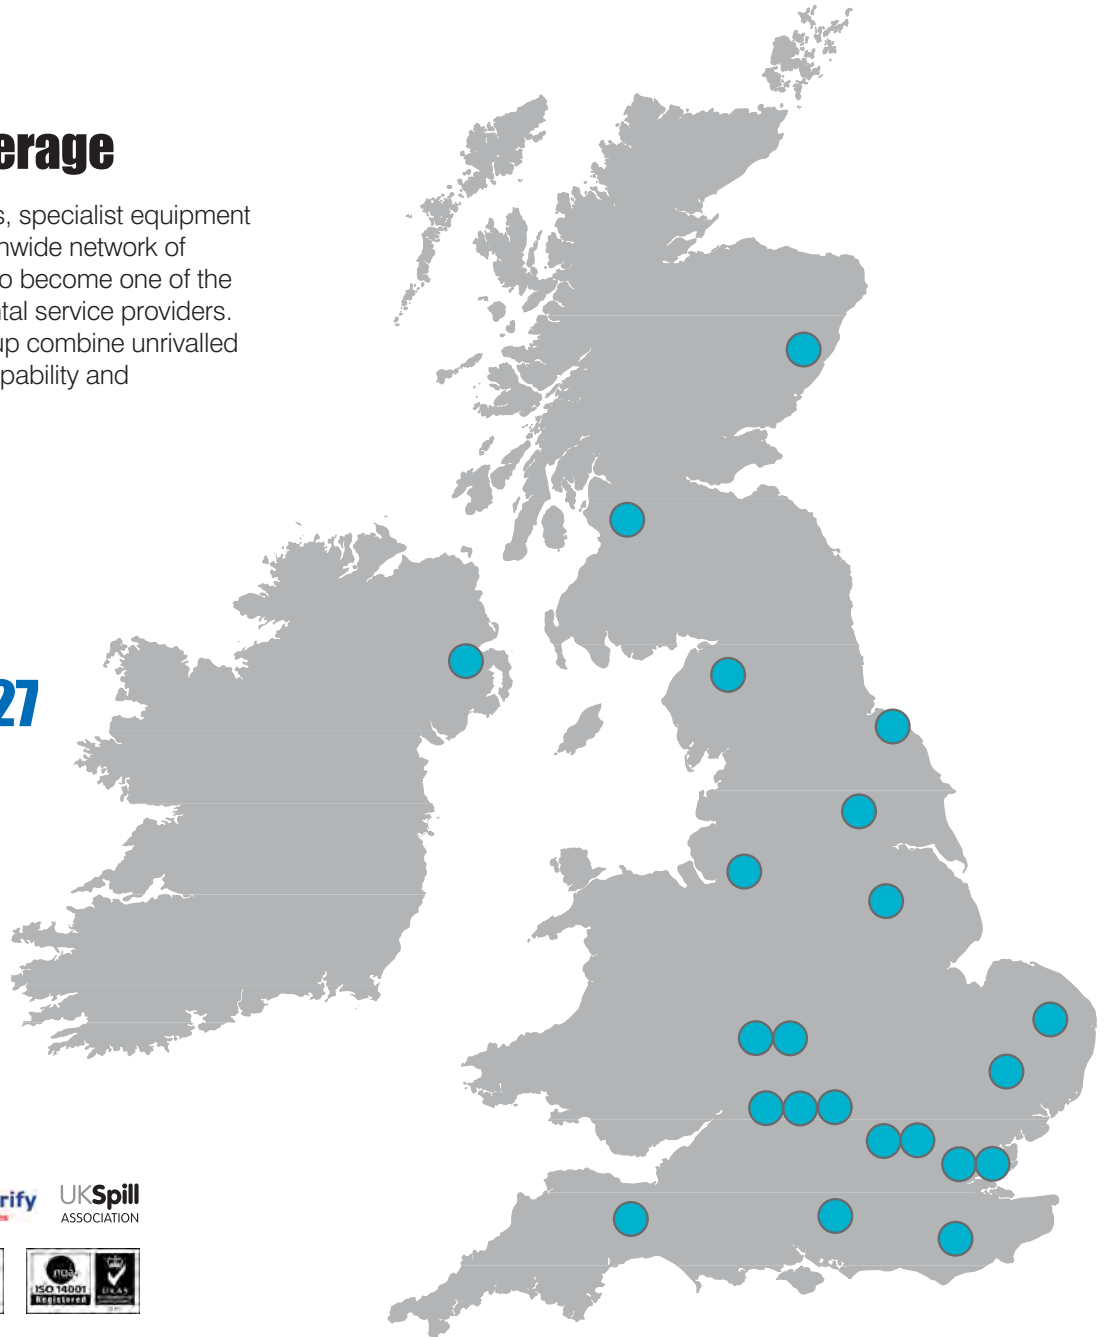

Tanks Structural Survey

- This should be carried out every five years under the Environmental Agency / Scottish Environment Protection Agency PPG3 and the European Standard EN858-2. Our engineers will carry out a full inspection of your installation and help resolve any issues identified.

National Coverage

With highly trained teams, specialist equipment and vehicles and a nationwide network of depots, we have grown to become one of the UK's leading environmental service providers. The Adler and Allan Group combine unrivalled customer service with capability and competitive pricing.

24 Hour Emergency Response
